Using the power of sunlight, the LilyPad™ eliminates the need for battery power, chemicals, pumping, cleaning filters or membranes.

The secret to this patented process is the award-winning nano-technology coated mesh, which harnesses the sun's natural energy to activate 5 simultaneous photochemical reactions to produce fresh, clean, sustainable water – even on cloudy days.

~ CLEAN ~ CLEAR ~ HEALTHY ~ WATER

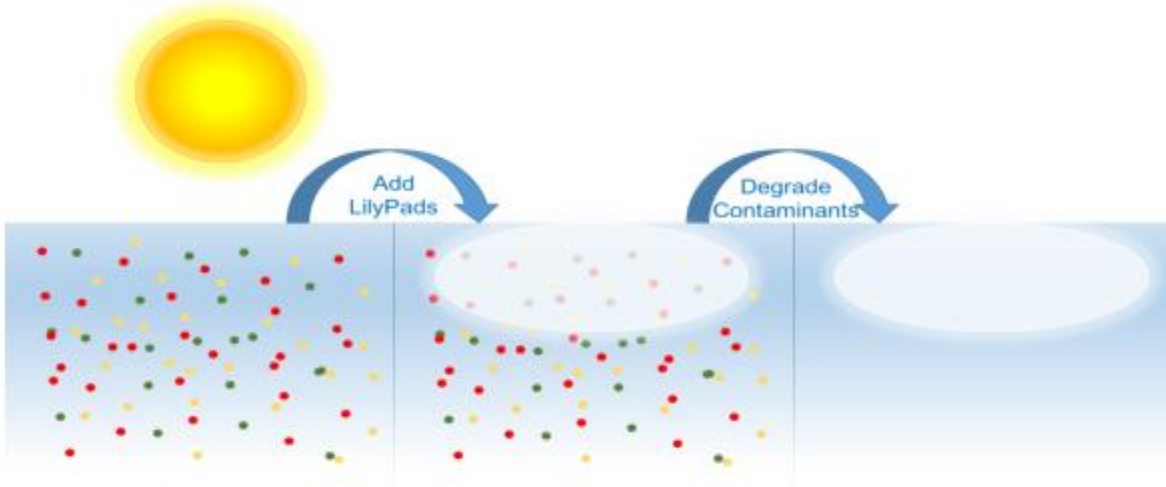

**Simple, Safe, Effective, Self-cleaning!**

**Potential Applications:**

- Industrial runoff
- Agricultural runoff
- Roadside and parking lot storm water
- Rooftop storm water
- Spill recovery
- Mining impact mitigation
- Biological and algal suppression

The reusable **LilyPad** is a simple purification system designed to float in ditches and ponds with unclean water. Without using chemicals, consumables, or power, the **LilyPad** is able to remove microorganisms, organic contaminants, and heavy metals, including all the revolting stuff in runoff from roadways — plastics, metals, bacteria, pesticides, petrochemicals, pharmaceuticals, etc. — while just lying there.

*Sunlight, even on a cloudy day, activates our new, powerful purification capability. Nanotechnology coated mesh destroys organic contaminants found in virtually all water sources.*

*Trace amounts of heavy metals are removed. Bacteria, viruses and protozoa are sterilized.*
