

PUROXI

WATER Treatment
for PLANTS, CROPS
HYDROPONICS

PURE WATER GLOBAL INC.

What is Puroxi Water Treatment?

Puroxi Pure Water Global Inc. takes great pride and care in using a base of *premium quality natural ingredients*.

We take a water analysis that is evaluated by a Certified Water Technician. After evaluation, we adjust the chemistry of your water to make it more effective. What we do is unique and quite effective in many ways.

Puroxi (OB) is a unique water treatment & purification system that has had successful results for many years. Our "Premium Quality" Product is stabilized to give it better efficacy. Our proprietary formulation is custom-made to fit your water needs. Our product helps disinfect and keep your plumbing clean and unplugged. With the addition of our stabilizer you will see long-lasting efficacy and protection for your pipes against corrosion. It also helps bind and tie up contaminants, while softening your water up to 25%.

The use of Puroxi (OB) for plants is an important "tool" to improve the quality of the most important nutrient - **water**. When your plant and soil have healthy, nutritional water it's a good start. Raising the oxygen levels will further contribute to your overall production success. We have well documented results from test trials and comparisons with a wide variety of crops, plants, trees, fruits, and vegetables, from many different growing operations.

- PUROXI Water Treatment is safe, readily available and very economical.
- PUROXI Water Treatment raises oxygen levels in the water, which helps all plants.
- Plants sprayed with PUROXI Water Treatment seem to have an improved immune system and stay healthy for their entire life-cycle.
- All crops can gain some benefit from PUROXI Water Treatment.

Additional Features & Benefits: (based on reports & observations from our customers)

- *can be applied with other fertilizers or weed applications*
- *benefits all crops and increases overall health and yields*
- *increased resistance to fungal, bacterial, and insect infestations*
- *helps keep water tanks clean*
- *helps keep sprayers clean – no more plugged nozzles*
- *can help to reduce or even eliminate the need for AMS (ammonium sulfate) depending on the hardness of water and the weather conditions*
- *will soften the water approximately 25%*

Application rates vary from operation to operation. For well-designed application rates, contact the Distributor in your area. If there is no Distributor, please contact us directly.

Note: This is not a "magic bullet" solution. Our customized formulation, procedures, and protocol depend on many factors, and available exclusively to our customers

PUROXI

PURE WATER GLOBAL INC.

WATER Treatment
for PLANTS, CROPS
HYDROPONICS

Puroxi Water Treatment is such a versatile product that can be applied using multiple methods while still maintaining its effectiveness.

METHODS OF APPLICATION

By using our application formula in your water you will see results of improvement, however, the observations listed above are from specific situations, based on their own unique results and experiences. All water is different; every environment is different; every operator is different; and of course, every soil and seed is different. We cannot guarantee you will see any specific result listed above. But what we can guarantee is that you will immediately have **clean, clear, nutritional water**, and in a very short time, better results than without our applications.

If this makes sense to you, please give us a call; we would love to have you as a customer.

CLEAN ~ CLEAR ~ NUTRITIONAL WATER IS OUR PASSION!

Caution: Do not add fertilizers in the water at the same time as you add Puroxi (OB), without doing a Jar Test. Some fertilizers might plug emitters when mixed with oxygen. Always consult either your local Distributor or us, prior to application, to make sure it is done right. Bacteria and contaminants are everywhere. Your seeds need to be disinfected, however, we do not suggest over-soaking your seeds for long periods of time. Note: There are hundreds of kinds of bacteria, specific to your crop, soil, and geographic location. We have not tested our products on all of them. However, we have the products, equipment, knowledge and resources to help you treat your specific fungal or bacterial issues.
