

Safe for the Environment

1 quart  
Treats up to  
150k gallons of manure

### For faster results, product works best in conjunction with OpenAll® MTA

- Enhance organic removal efficiency of biological systems; lowering effluent BOD, COD, and TSS.
- Enhance solids settling where it has been disturbed by loading fluctuations.
- Accelerate the start-up of new systems and aids recovery after upsets.
- Improve cold weather operation.
- Reduce sludge build-up.
- Cost effective and sustainable results.
- Easy to apply and works fast and effectively.
- Eliminates noxious odors.
- Reduces nitrates and phosphates.
- Non-toxic, non-hazardous & non-genetically manipulated.

OpenAll® LBA is a liquid product; which contains a specially formulated range of adapted high performance micro-organisms, natural catalysts and enzymes. This product was developed to increase the degradation efficiency, lower agitation and pump out costs. The range of microorganisms selected are chosen for their degradation abilities, under both aerobic and anaerobic conditions. To ensure optimal performance of these organisms under the toughest conditions, they are blended together with “high potency” nutrients and stimulants.

OpenAll® LBA is HIGHLY CONCENTRATED. The solution becomes activated and ready to use when mixed with 10 parts water. Treat the application area according to the following table:

Level of Solids	OpenAll® LBA	Gallons of Manure
Heavy	1 quart	60,000
Moderate	1 quart	90,000
Light	1 quart	150,000
